RE: Letter of Reference  
COMELCO, Inc.

To Whom it may Concern:

During the latter part of 1999 I had the distinct pleasure of working with COMELCO, Inc. in the development of a primitive site (42 acres) to a finished product consisting of a educational center complete with all site systems, infrastructure, thirteen relocatable buildings, and a two hundred fifty (250) car parking lot with associated roadways. The project had a ninety (90) day completion period. The project was completed on time and the owner occupied the site on schedule with no interruption or delay to scheduled classes and programs.

COMELCO performed in an extraordinary manner during the performance of this work. In many instances the pace of a project is established and maintained by the performance of a specific sub contractor ... in this instance the pace was set by COMELCO. This yeoman effort was due to the direct involvement of the firm's president, Mr. Jesse Gonzalez, and the skills and management capability of the firm's project manager Mr. Whitney Rowland. The workmanship present in the work is of good quality and it is noted that there have been no 'warranty or latent construction deficiencies' issued by the Owner for any deficient electrical materials or work.

I personally and professionally have no hesitation in recommending this firm as a participant and team member for any project.

Sincerely,

Robert E. Ratliff  
Facilities Coordinator
